

Apparatus for determining the water vapour permeability of leather, artificial leather and textiles as per DIN 53333 (IUP 15)

Technical Data:

Totally-enclosed housing accomodating the electrical equipment and motor protection switches, protection against accidental contact.

Flas-turnable with clamping flange designed to take 6 flasks.

Speed of flask-turnable: 75 UpM

Motor: 380 V 3 ph 50 Hz 0.09 kW 0.6 Amp.

Swivelmpunted fan (Speed 1400 rpm)

Motor: 380 V 3 ph 50 Hz 0.09 kW 0.6 Amp.

The delivery include 6 flasks, each with an opening in the screw top of 30 mm diameter.

Outer dimensions: 52 x 40 x 40 cm

Net weight: 26 kg
